USU @ LISMORE

November 2023

We, the undersigned, call on Lismore City Council to maintain waste services in-house. It is vital to the community that these essential services with secure jobs do not get outsourced to profit making private enterprise. Further, we call on Council to work with the United Services Union and commit in writing that they will explore all options for upgrading existing fleet vehicles with GPS technology and explore funding options for trucks that need to be replaced.
